

# D<sup>3</sup> ODBC 2.0.27

## Enhancements & Resolutions

### Enhancements

#### Documentation

| Action ID | Description                              |
|-----------|--|
|           | Updated D3 ODBC and D3 SQL User's Guide. |

### Resolutions

#### ODBC DLL (MS Windows)

| Action ID | Description   |
|-----------|---|
| 23985     | Corrected a problem with the D3 ODBC Client Software Installation that caused the installation to abort when the AUTO flag was used.  |
| 25022     | Corrected a problem in the D3 ODBC client that caused time, date or timestamp data supplied from applications such as MsQuery to cause an error TYPE_MISMATCH on the ODBC server. |
| 25390     | Corrected a problem with the D3 ODBC Client that caused File DSNs to always store and re-display a version of 7.1.X even when the user selected 7.0.X or 7.2.X.                   |
| 23985     | Corrected a problem with the D3 ODBC Client Software Installation that caused the installation to abort when the AUTO flag was used.  |

## *Visual Basic*

| Action ID | Description   |
|-----------|---|
| 25651     | Corrected a problem with the D3 ODBC Class library that caused VB5 applications to abort with the error -2147220472 "File not present or is empty" when a pointer is set to a second rule module object before closing the first rule module object. This error occurs only in the executable, not in development mode. |
